

# Coffee Filter Turkey

## Supplies You Will Need:

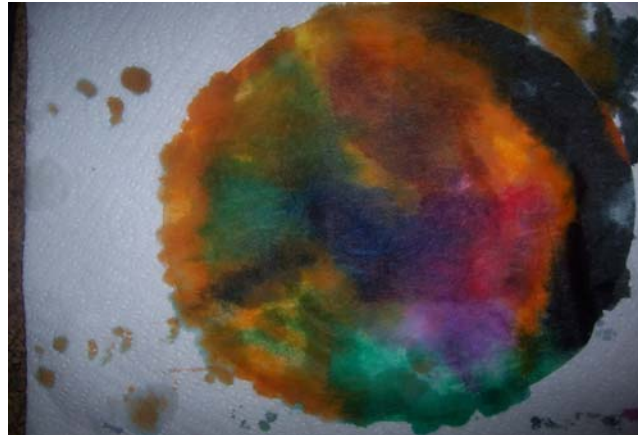

- Coffee filter
- Washable markers
- Spray bottle filled with water
- Paper towels
- Construction paper (brown, orange, and red)
- 2 plastic eyes
- Brown pipe cleaner
- Circle pattern (small and medium)
- glue

## Directions for Coffee Filter Turkey:

1. Use the washable markers to color randomly all over the coffee filter.

2. Hold the colored coffee filter over the sink and spray lightly with water. Colors should begin to run together. Continue to spray and turn the coffee filter until all the colors run together.
3. Place the coffee filter on a couple of layers of paper towels while it dries.

4. While the coffee filter is drying, trace and cut out a small and medium sized circle for the turkey's head and turkey's body.
5. Glue the head to the body, then glue the eyes to the face. Add an orange triangle for the nose, and a red wattle. Glue the pipe cleaner legs and feet to the body.
6. Glue the turkey's head and body to the coffee filter.
