

Valentine's Heart Tear Art

This is a simple and easy craft project for toddlers and preschoolers. My 2 ½ year old made this with very little help or guidance.

Supplies:

- Red, pink, and white construction paper
- Scissors
- Glue

Directions:

- Cut out a heart shape from the white construction paper
- Let the child or assist the child with tearing pieces from the red and pink construction paper.
- Apply glue to the white heart and let the child place torn pieces of construction paper over the glue until the heart is covered with a random pattern of pink and red pieces of construction paper.
